SUMMARY

DevOps Engineer with 13+ years of IT experience across infrastructure administration, cloud operations, and DevOps engineering. Experienced in designing and automating cloud-native platforms on AWS and Azure using Kubernetes, Terraform, Docker, GitHub Actions, Jenkins, and GitOps practices.

Hands-on experience building production-ready CI/CD pipelines, Kubernetes deployments, Infrastructure as Code, monitoring platforms, and cloud automation. Strong background in Linux administration, troubleshooting distributed applications, cloud networking, and modern DevOps practices.

PROFESSIONAL HIGHLIGHTS

- 13+ Years IT Experience
- 5+ Years Cloud Infrastructure
- AWS (EKS, EC2, RDS, ALB) | Azure (App Service, PostgreSQL)
- Kubernetes (EKS, k3s)
- Terraform & Infrastructure as Code
- GitHub Actions | Jenkins | GitOps (Argo CD)
- Docker | Helm
- Linux Administration
- Observability (Prometheus, Grafana, Loki)
- CI/CD Automation

CORE SKILLS

Cloud Platforms AWS, Azure	Containers & Orchestration Kubernetes, Docker, Helm	CI/CD & GitOps GitHub Actions, GitLab CI, Jenkins, ArgoCD
Infrastructure as Code Terraform, Ansible	Monitoring Prometheus, Grafana, Loki, CloudWatch	Programming Bash, Python, PowerShell
Databases PostgreSQL, MySQL, MSSQL	Operating Systems Linux, Windows	

PROFESSIONAL EXPERIENCE

- DevOps Consultant, Independent** Dec 2025 – Present
- Architecting and managing AWS infrastructure for client applications using EC2, ALB, CloudFront, RDS PostgreSQL, and secure VPC networking.
 - Automating infrastructure provisioning and application deployments using Terraform and GitHub Actions to reduce manual provisioning and improve deployment consistency.
 - Delivering a containerized CRM platform using Docker Compose, Nginx, and Microsoft SQL Server with automated TLS certificate management.
 - Managing Linux servers supporting production workloads, improving deployment reliability through standardized automation and configuration management.
 - Developing reusable Infrastructure as Code templates and CI/CD workflows to accelerate application delivery.
- DevOps Engineer, MTG TECHSOFT** Nov 2023 – Oct 2025 | Ranipet
- Designed and implemented CI/CD pipelines using GitHub Actions, Jenkins, SonarQube, and Nexus, reducing manual deployment effort by ~60% and improving release consistency across multiple environments.
 - Deployed and managed containerized microservices (.NET, Java, Node.js, Angular) on EKS and k3s using Docker, Helm, ArgoCD, and Kubernetes manifests, improving deployment consistency across development and production.
 - Implemented centralized monitoring and alerting using Prometheus, Grafana, Loki and Grafana Alloy, reducing troubleshooting time and improving production visibility.
 - Provisioned and version-controlled AWS infrastructure (VPC, ALB, RDS, ECR, EKS) using Terraform, enabling consistent, repeatable deployments across dev and production with zero manual console changes.

- Deployed Azure PaaS workloads (App Service, PostgreSQL Flexible Server, Static Web Apps) using Terraform and GitHub Actions for automated infrastructure delivery.
- Established GitOps deployment workflows using ArgoCD for EKS and k3s clusters, enabling fully automated Kubernetes deployments.

Cloud Administrator, B.C.M. Educational Institutions

May 2021 – Nov 2023 | Dewas

- Managed AWS and Azure environments for computer lab infrastructure serving around 80 students; handled EC2/VMs, IAM, storage, and basic networking.
- Configured VPCs, subnets, and security groups; deployed web applications and database systems on cloud.
- Automated user provisioning, system maintenance, and reporting tasks using Bash and PowerShell scripts.
- Set up backup and disaster recovery procedures across AWS and Azure to ensure system availability and data protection.

System Administrator, B.C.M. Educational Institutions

July 2016 – April 2021 | Dewas

- Managed Windows/Linux servers, DNS, DHCP, and Active Directory; automated sysadmin tasks via Bash scripts.
- Implemented backups, server security, user access, and system monitoring to ensure reliable IT operations.

Earlier roles

2003 – 2016

Technical Support Engineer (L2), Group Leader (L1), Computer Operator - system troubleshooting, OS support, and IT operations.

FEATURED DEVOPS PROJECTS

VProfile GitOps EKS Platform

[AWS EKS](#) | [ArgoCD](#) | [Terraform](#) | [GitHub Actions](#) | [Helm](#) | [ECR](#) | [Slack](#) [↗](#)

- Designed and implemented a GitOps platform on AWS EKS using Terraform, ArgoCD, Helm, and GitHub Actions.
- Automated Docker image build, security scanning, and deployments via GitHub Actions, Amazon ECR, and ArgoCD.
- Implemented IRSA, AWS Load Balancer Controller, SonarCloud, and Slack-integrated deployment workflows.

Emart DevOps Platform

[Microservices](#) | [Kubernetes \(k3s\)](#) | [GitOps](#) | [Observability](#) [↗](#)

- Designed and deployed Node.js, Java, Angular microservices on k3s using Docker and Kubernetes manifests.
- GitHub Actions CI pipelines and ArgoCD-based GitOps deployments.
- Integrated Prometheus + Grafana for observability and Trivy for container security scanning.

AWS EKS .NET Microservices Platform

[AWS EKS](#) | [Terraform](#) | [.NET Core](#) | [Prometheus](#) | [Grafana](#) [↗](#)

- Containerized .NET microservices on EKS; Terraform-provisioned VPC, RDS PostgreSQL, EKS cluster.
- ALB/NGINX Ingress for external traffic routing; GitHub Actions CI/CD for automated build and deploy.
- Prometheus + Grafana integrated for cluster and application-level monitoring.

Azure DevOps E-Commerce Platform

[Azure App Service](#) | [PostgreSQL Flexible Server](#) | [Terraform](#) | [GitHub Actions](#) [↗](#)

- Migrated e-commerce application from VPS to Azure App Service, PostgreSQL Flexible Server, and Static Web Apps.
- Provisioned Azure infrastructure with Terraform and automated deployments using GitHub Actions pipelines.

Additional DevOps Projects:

More production-grade DevOps implementations are available on GitHub and the portfolio website.

EDUCATION

Bachelor's Degree (B.Sc.), St. Mary's College, Sulthan Bathery

2003

CERTIFICATIONS & TRAINING

AWS DevOps with Projects (Udemy)

Azure Administrator Training (Pragathi Technologies)

VMware vSphere ESXi & vCenter Administration (Udemy)

Computer Hardware & Networking (Jetking)
