## SUMMARY

DevOps Engineer with nearly 3 years of hands-on production experience in building and supporting cloud-native platforms using AWS, Kubernetes, Terraform, Docker, GitHub Actions and CI/CD practices. Supported by 5+ years of AWS and Azure cloud administration and a broader background of 13+ years in IT infrastructure, systems administration and production support.

## PROFESSIONAL HIGHLIGHTS

- Experience: Nearly 3 Years DevOps | 5+ Years AWS/Azure Cloud Administration | 13+ Years IT Infrastructure
- CI/CD Pipeline Design: GitHub Actions, Jenkins, SonarQube, Nexus
- Kubernetes & GitOps: EKS, k3s, Helm, ArgoCD
- Infrastructure as Code: Terraform (AWS & Azure)
- Docker & Containerization
- Monitoring & Observability: Prometheus, Grafana, Loki, CloudWatch
- Linux Administration & Automation

## CORE SKILLS

|                                                                                                                                                       |                                                                          |                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|-------------------------------------------------------------------------|
| <b>Cloud Platforms</b><br>AWS (EC2, EKS, IAM, VPC, ALB, RDS, S3, ECR, CloudWatch)<br>Azure (App Service, PostgreSQL Flexible Server, Static Web Apps) | <b>Containers &amp; Orchestration</b><br>Kubernetes, Docker, Helm        | <b>CI/CD &amp; GitOps</b><br>GitHub Actions, GitLab CI, Jenkins, ArgoCD |
| <b>Infrastructure as Code</b><br>Terraform, Ansible                                                                                                   | <b>Monitoring &amp; Logging</b><br>Prometheus, Grafana, Loki, CloudWatch | <b>Scripting</b><br>Bash, Python, PowerShell                            |

## PROFESSIONAL EXPERIENCE

- DevOps Engineer, Independent Consulting**

Dec 2025 – Present

  - Architecting and managing AWS infrastructure for client applications using EC2, ALB, CloudFront, RDS PostgreSQL, and secure VPC networking.
  - Automating infrastructure provisioning and application deployments using Terraform and GitHub Actions to reduce manual provisioning and improve deployment consistency.
  - Delivering a containerized CRM platform using Docker Compose, Nginx, and Microsoft SQL Server with automated TLS certificate management.
  - Managing Linux servers supporting production workloads, improving deployment reliability through standardized automation and configuration management.
  - Developing reusable Infrastructure as Code templates and CI/CD workflows to accelerate application delivery.
- DevOps Engineer, MTG TECHSOFT**

Nov 2023 – Oct 2025 | Ranipet

  - Designed and implemented CI/CD pipelines using GitHub Actions, Jenkins, SonarQube, and Nexus, reducing manual deployment effort by ~60% and improving release consistency across multiple environments.
  - Provisioned and version-controlled AWS infrastructure (VPC, ALB, RDS, ECR, EKS) using Terraform, enabling consistent, repeatable deployments across dev and production with zero manual console changes.
  - Deployed and managed containerized microservices (.NET, Java, Node.js, Angular) on EKS and k3s using Docker, Helm, ArgoCD, and Kubernetes manifests, improving deployment consistency across development and production.
  - Established GitOps deployment workflows using ArgoCD for EKS and k3s clusters, enabling fully automated Kubernetes deployments.
  - Deployed Azure PaaS workloads (App Service, PostgreSQL Flexible Server, Static Web Apps) using Terraform and GitHub Actions for automated infrastructure delivery.
  - Implemented centralized monitoring and alerting using Prometheus, Grafana, Loki and Grafana Alloy, reducing troubleshooting time and improving production visibility.

## Cloud Administrator, B.C.M. Educational Institutions

May 2021 – Nov 2023 | Dewas

- Managed AWS and Azure environments for computer lab infrastructure serving around 80 students; handled EC2/VMs, IAM, storage, and basic networking.
- Configured VPCs, subnets, and security groups; deployed web applications and database systems on cloud.
- Automated user provisioning, system maintenance, and reporting tasks using Bash and PowerShell scripts.
- Set up backup and disaster recovery procedures across AWS and Azure to ensure system availability and data protection.

## System Administrator, B.C.M. Educational Institutions

July 2016 – April 2021 | Dewas

- Managed Windows/Linux servers, DNS, DHCP, and Active Directory; automated sysadmin tasks via Bash scripts.
- Implemented backups, server security, user access, and system monitoring to ensure reliable IT operations.

## Earlier roles

2003 – 2016

Technical Support Engineer (L2), Group Leader (L1), Computer Operator - system troubleshooting, OS support, and IT operations.

## FEATURED DEVOPS PROJECTS

---

### VProfile GitOps EKS Platform

[AWS EKS](#) | [ArgoCD](#) | [Terraform](#) | [GitHub Actions](#) | [Helm](#) | [ECR](#) | [Slack](#) [↗](#)

- Designed and implemented a GitOps platform on AWS EKS using Terraform, ArgoCD, Helm, and GitHub Actions.
- Automated Docker image build, security scanning, and deployments via GitHub Actions, Amazon ECR, and ArgoCD.
- Implemented IRSA, AWS Load Balancer Controller, SonarCloud, and Slack-integrated deployment workflows.

### Emart DevOps Platform

[Microservices](#) | [Kubernetes \(k3s\)](#) | [GitOps](#) | [Observability](#) [↗](#)

- Designed and deployed Node.js, Java, Angular microservices on k3s using Docker and Kubernetes manifests.
- GitHub Actions CI pipelines and ArgoCD-based GitOps deployments.
- Integrated Prometheus + Grafana for observability and Trivy for container security scanning.

### AWS EKS .NET Microservices Platform

[AWS EKS](#) | [Terraform](#) | [.NET Core](#) | [Prometheus](#) | [Grafana](#) [↗](#)

- Containerized .NET microservices on EKS; Terraform-provisioned VPC, RDS PostgreSQL, EKS cluster.
- ALB/NGINX Ingress for external traffic routing; GitHub Actions CI/CD for automated build and deploy.
- Prometheus + Grafana integrated for cluster and application-level monitoring.

### Azure DevOps E-Commerce Platform

[Azure App Service](#) | [PostgreSQL Flexible Server](#) | [Terraform](#) | [GitHub Actions](#) [↗](#)

- Migrated e-commerce application from VPS to Azure App Service, PostgreSQL Flexible Server, and Static Web Apps.
- Provisioned Azure infrastructure with Terraform and automated deployments using GitHub Actions pipelines.

### Additional DevOps Projects:

More production-grade DevOps implementations are available on GitHub and the portfolio website.

## EDUCATION

---

**Bachelor's Degree (B.Sc.), St. Mary's College, Sulthan Bathery**

2003

## CERTIFICATIONS & TRAINING

---

AWS DevOps Engineering Training (MNP Technologies)  
DevOps Beginners to Advanced with Projects (Udemy)  
Azure Administrator Training (Pragathi Technologies)  
Computer Hardware & Networking (Jetking)
